

## Tutorial QGIS

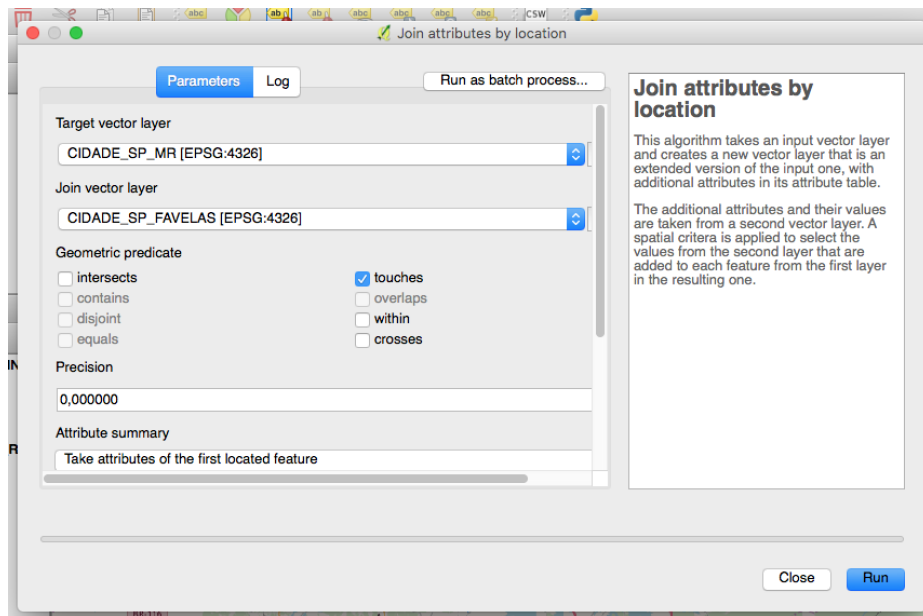

- 1) Carregue os *Shapefiles* que serão utilizados no *join espacial* através do menu *Layer -> Add Layer -> Add Vector Layer*

- 2) O Join espacial pode ser feito através do menu *Vector -> Data Management Tools -> Join atributes by location*

Execute o algoritmo

- 3) Salve o *shapefile* resultante clicando com o botão direito do mouse sobre o layer, e escolhendo a opção *save as*
